Question 1 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_1.

(A) Value A_1 (B) Value B_1 (C) Value C_1 (D) Value D_1

Question 2 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_2.

(A) Value A_2 (B) Value B_2 (C) Value C_2 (D) Value D_2

Question 3 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_3.

(A) Value A_3 (B) Value B_3 (C) Value C_3 (D) Value D_3

Question 4 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_4.

(A) Value A_4 (B) Value B_4 (C) Value C_4 (D) Value D_4

Question 5 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_5.

(A) Value A_5 (B) Value B_5 (C) Value C_5 (D) Value D_5

Question 6 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_6.

(A) Value A_6 (B) Value B_6 (C) Value C_6 (D) Value D_6

Question 7 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_7.

(A) Value A_7 (B) Value B_7 (C) Value C_7 (D) Value D_7

Question 8 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_8.

(A) Value A_8 (B) Value B_8 (C) Value C_8 (D) Value D_8

Question 9 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_9.

(A) Value A_9 (B) Value B_9 (C) Value C_9 (D) Value D_9

Question 10 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_10.

(A) Value A_10 (B) Value B_10 (C) Value C_10 (D) Value D_10

Question 11 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_11.

(A) Value A_11 (B) Value B_11 (C) Value C_11 (D) Value D_11

Question 12 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_12.

(A) Value A_12 (B) Value B_12 (C) Value C_12 (D) Value D_12

Question 13 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_13.

(A) Value A_13 (B) Value B_13 (C) Value C_13 (D) Value D_13

Question 14 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_14.

(A) Value A_14 (B) Value B_14 (C) Value C_14 (D) Value D_14

Question 15 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_15.

(A) Value A_15 (B) Value B_15 (C) Value C_15 (D) Value D_15

Question 16 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_16.

(A) Value A_16 (B) Value B_16 (C) Value C_16 (D) Value D_16

Question 17 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_17.

(A) Value A_17 (B) Value B_17 (C) Value C_17 (D) Value D_17

Question 18 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_18.

(A) Value A_18 (B) Value B_18 (C) Value C_18 (D) Value D_18

Question 19 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_19.

(A) Value A_19 (B) Value B_19 (C) Value C_19 (D) Value D_19

Question 20 (Chemistry)

Consider the standard equilibrium reaction or function for state parameter k_20.

(A) Value A_20 (B) Value B_20 (C) Value C_20 (D) Value D_20

Question 21 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [35.0]

Question 22 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [40.0]

Question 23 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [45.0]

Question 24 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [52.0]

Question 25 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [55.0]

Question 26 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [60.0]

Question 27 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [65.0]

Question 28 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [70.0]

Question 29 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [77.0]

Question 30 (Chemistry)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [80.0]

Question 31 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_31.

(A) Value A_31 (B) Value B_31 (C) Value C_31 (D) Value D_31

Question 32 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_32.

(A) Value A_32 (B) Value B_32 (C) Value C_32 (D) Value D_32

Question 33 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_33.

(A) Value A_33 (B) Value B_33 (C) Value C_33 (D) Value D_33

Question 34 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_34.

(A) Value A_34 (B) Value B_34 (C) Value C_34 (D) Value D_34

Question 35 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_35.

(A) Value A_35 (B) Value B_35 (C) Value C_35 (D) Value D_35

Question 36 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_36.

(A) Value A_36 (B) Value B_36 (C) Value C_36 (D) Value D_36

Question 37 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_37.

(A) Value A_37 (B) Value B_37 (C) Value C_37 (D) Value D_37

Question 38 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_38.

(A) Value A_38 (B) Value B_38 (C) Value C_38 (D) Value D_38

Question 39 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_39.

(A) Value A_39 (B) Value B_39 (C) Value C_39 (D) Value D_39

Question 40 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_40.

(A) Value A_40 (B) Value B_40 (C) Value C_40 (D) Value D_40

Question 41 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_41.

(A) Value A_41 (B) Value B_41 (C) Value C_41 (D) Value D_41

Question 42 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_42.

(A) Value A_42 (B) Value B_42 (C) Value C_42 (D) Value D_42

Question 43 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_43.

(A) Value A_43 (B) Value B_43 (C) Value C_43 (D) Value D_43

Question 44 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_44.

(A) Value A_44 (B) Value B_44 (C) Value C_44 (D) Value D_44

Question 45 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_45.

(A) Value A_45 (B) Value B_45 (C) Value C_45 (D) Value D_45

Question 46 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_46.

(A) Value A_46 (B) Value B_46 (C) Value C_46 (D) Value D_46

Question 47 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_47.

(A) Value A_47 (B) Value B_47 (C) Value C_47 (D) Value D_47

Question 48 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_48.

(A) Value A_48 (B) Value B_48 (C) Value C_48 (D) Value D_48

Question 49 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_49.

(A) Value A_49 (B) Value B_49 (C) Value C_49 (D) Value D_49

Question 50 (Physics)

Consider the standard equilibrium reaction or function for state parameter k_50.

(A) Value A_50 (B) Value B_50 (C) Value C_50 (D) Value D_50

Question 51 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [25.0]

Question 52 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [30.0]

Question 53 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [35.0]

Question 54 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [40.0]

Question 55 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [45.0]

Question 56 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [50.0]

Question 57 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [57.0]

Question 58 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [60.0]

Question 59 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [65.0]

Question 60 (Physics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [70.0]

Question 61 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_61.

(A) Value A_61 (B) Value B_61 (C) Value C_61 (D) Value D_61

Question 62 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_62.

(A) Value A_62 (B) Value B_62 (C) Value C_62 (D) Value D_62

Question 63 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_63.

(A) Value A_63 (B) Value B_63 (C) Value C_63 (D) Value D_63

Question 64 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_64.

(A) Value A_64 (B) Value B_64 (C) Value C_64 (D) Value D_64

Question 65 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_65.

(A) Value A_65 (B) Value B_65 (C) Value C_65 (D) Value D_65

Question 66 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_66.

(A) Value A_66 (B) Value B_66 (C) Value C_66 (D) Value D_66

Question 67 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_67.

(A) Value A_67 (B) Value B_67 (C) Value C_67 (D) Value D_67

Question 68 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_68.

(A) Value A_68 (B) Value B_68 (C) Value C_68 (D) Value D_68

Question 69 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_69.

(A) Value A_69 (B) Value B_69 (C) Value C_69 (D) Value D_69

Question 70 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_70.

(A) Value A_70 (B) Value B_70 (C) Value C_70 (D) Value D_70

Question 71 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_71.

(A) Value A_71 (B) Value B_71 (C) Value C_71 (D) Value D_71

Question 72 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_72.

(A) Value A_72 (B) Value B_72 (C) Value C_72 (D) Value D_72

Question 73 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_73.

(A) Value A_73 (B) Value B_73 (C) Value C_73 (D) Value D_73

Question 74 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_74.

(A) Value A_74 (B) Value B_74 (C) Value C_74 (D) Value D_74

Question 75 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_75.

(A) Value A_75 (B) Value B_75 (C) Value C_75 (D) Value D_75

Question 76 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_76.

(A) Value A_76 (B) Value B_76 (C) Value C_76 (D) Value D_76

Question 77 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_77.

(A) Value A_77 (B) Value B_77 (C) Value C_77 (D) Value D_77

Question 78 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_78.

(A) Value A_78 (B) Value B_78 (C) Value C_78 (D) Value D_78

Question 79 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_79.

(A) Value A_79 (B) Value B_79 (C) Value C_79 (D) Value D_79

Question 80 (Mathematics)

Consider the standard equilibrium reaction or function for state parameter k_80.

(A) Value A_80 (B) Value B_80 (C) Value C_80 (D) Value D_80

Question 81 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [15.0]

Question 82 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [20.0]

Question 83 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [25.0]

Question 84 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [32.0]

Question 85 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [35.0]

Question 86 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [40.0]

Question 87 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [45.0]

Question 88 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [50.0]

Question 89 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [55.0]

Question 90 (Mathematics)

Evaluate the integral / rate constant to the nearest single decimal place.

Candidate Response: [60.0]
